SUMMARY

MSc Artificial Intelligence student at the University of Amsterdam with experience in applied deep learning, AI systems integration, and educational initiatives. Skilled in machine learning, natural language processing, reinforcement learning, and full-stack prototyping. Passionate about AI research, interpretability, and making complex concepts accessible.

WORK EXPERIENCE

IT Developer, Amsterdam University of Applied Sciences Sept 2023 – Present

- Integrated AI into departmental workflows through research initiatives and prototypes.
- Developed a Microsoft Azure-based chatbot for employee FAQs.
- Initiated and led the *AI for Dummies* workshop series to increase AI awareness.
- Built functional web tools for prototyping AI-driven ideas.

Student Assistant, Amsterdam University of Applied Sciences Oct 2022 – Sept 2023

- Conducted statistical research and provided IT support for student platforms.
- Assisted with small research projects and piloted AI solutions within the department.

PROJECTS

Enhancing Few-Shot Robotic Manipulation

[Code](#)

Deep Learning 2 Course Project, 2025

Integrated MAST3R (3D reconstruction) into RVT-2 robotic vision pipeline. Demonstrated robust manipulation without RGB-D sensors.

AI for Dummies

[Website](#)

Making AI concepts accesible, 2025 — Present

Created an educational initiative explaining AI concepts to beginners through workshops and lessons on ML, probability, and generative AI.

Exploring Language Compositionality in Multi-Agent Systems

[Code](#)

Bachelor Thesis, 2024

Investigated the emergence of compositional language in referential games with Graph Neural Networks. Grade: 8.0/10.

EDUCATION

2024 – 2026 MSc – Artificial Intelligence, **University of Amsterdam**

(GPA: 7.5/10)

2019 – 2024 BSc – Bèta Gamma, Major Artificial Intelligence, **University of Amsterdam**

(GPA: 7.5/10)

2017 High School Diploma, **Jac. P. Thijssen College**, Castricum (VWO)

PUBLICATIONS

Reassessing Fairness: A Reproducibility Study of NIFA's Impact on GNN Models.

Mees Lindeman, Ruben Figge, Sjoerd Gunneweg, Aaron Kuin.

Transactions on Machine Learning Research (TMLR), 2025. *Accepted*.

Selected for presentation at the 2025 Machine Learning Reproducibility Challenge, Princeton University.

SKILLS

Programming	Python, PyTorch, NumPy, scikit-learn, OpenCV, Matplotlib, Pandas, HTML/CSS, SQL
Frameworks/Tools	Docker, Singularity, Microsoft Azure, Node.js, React, Git

CERTIFICATES

- 2017 **Language A: Language and Literature**, International Baccalaureate. Demonstrated advanced literary analysis and communication skills.
- 2014 **Certificate in Advanced English (CAE)**, Cambridge English. Internationally recognized qualification of English proficiency.

EXTRACURRICULAR

- 2017 – 2018 **Semester High School**, Iowa, USA. During a gap year in my studies, I attended a semester of High School in the United States, where I had the opportunity to enhance my English skills and embrace diverse experiences and cultures.
